

## A success right from the start!

The goal of founding a company for innovative and modern treatment concepts for keeping beauty and health has been natural for the owner of the company, Mrs. Dr. med. K. Komender-Spira. But there is a lot more to the philosophy of the SKIN JET Cosmetic • Medical • Wellness GmbH in Darmstadt. The success of the company concept turned up even in the first years. From the beginning, the connection of device methods and product mega-treatment programmes stood by the keeping of beauty and health, of body, organs, skin and soul. This innovative company philosophy – aesthetic medicine with effective cosmetic, avant-garde anti-aging and body orientated wellness – has brought the company SKIN JET so far that its successful concept is applied all over the world. This is all due to the committed and creative founder, Dr. med. K. Komender-Spira.

## One step ahead of the current development

The trend setter for medical beauty and wellness expert even today researches and develops the caring products and treatment programmes of tomorrow. Therefore she has won very high recognition of doctors in cosmetic-medical practices, of cosmeticians and wellness suppliers world wide. The success lies in the specialization of the company. Development and production of all treatment devices as well as of the adjusted and continuing caring products are “from one hand”. The team of Dr.

Komender-Spira (development of the product lines and treatment concepts) and Dr. Ing. Spira (development of the devices) had already been talked about world wide eight years ago with the development of microdermabrasion with ultrasound. Research and modernization led to new treatment systems like e. g. the Air-Pulsator (vacuum-pulsation-lymph-massage) applied by practices and institutes today as well as the new development of the ultrasound resp. the ultrasound heads. The ultrasound heads, first made of ceramic, later of quartz-ceramic in the magnetic field and today of quartz-ceramic in the magnetic field with simultaneous red light effect, are applied successfully for the benefit of the customer. Keeping a healthy, beautiful skin is guaranteed due to the research, development and production of all product lines. The goal of developing an assortment of active substances cosmetic, systematic care and concepts for the needs of care sensitive people has been reached today due to the dynamics of the company. But behind it is hard work, absolute control and the wholehearted keeping of the company philosophy “everything from one hand”.

## **Innovation forms the company**

In 2004 the SKIN JET Clinic and the Cosmetic • Medical • Wellness Centre was opened in Darmstadt city after the ideas and the artistic know-how of Dr. Komender-Spira. She can be proud of this centre. Very often she is consulted as an adviser for practice organisation, planning and interior decoration. But she is also proud of the production of devices and products taking place in Germany, of her excellently directed further education centre in Darmstadt and of the comfortable customer service very appreciated by the customers.
